

Rainbow Aquamate/Rainjet Demonstration

Rainjet

So far everything I have shown will come with your Rainbow tonight.

However, the next thing I'm going to show you does NOT come with your Rainbow tonight but don't worry like I said early I will show you how to get it free later.

As a matter of fact, on the 14 Day Program you get this on the 4th demo we do.

John & Mary how often do you mop your floors?

What do you use to mop your floor? (Kill the way they mop)

Mop and a bucket:

OK and how many mops do you have?

1, so you mop your bathroom, and we know what is on the floor in there and then you use the same mop to mop your kitchen.

Have you ever smelled your mop after it sat in the garage or closet for a week in between mopping, it smells like a dead animal because of all the germs and bacteria that have been growing all week?

Then you take the mop and stick it into the bucket of water but after that is the water clean anymore.

That proves that your mop has been full of germs and bacteria.

Now you take and pretty much paint your floor with germs and bacteria.

Not only is it unhealthy but the grout gets dirty because all the dirty water soaks into it, and because you have used dirty water you are going to need to mop a lot sooner then you wanted to.

Swiffer:

How many of them do you need to use every time you mop?

That gets expensive.

Also, they say on the box of swiffers that they are harmful to the health of pets because the pets get the stuff on their paws then lick their paws.

If they are harmful to animals I don't know if I want my kids crawling around on the floor.

Well John & Mary let me show you how to do it a lot easier. (Demo Rainjet)

All you do is spray the cleaner and water down on the floor.

Now the first time you do this it might be a little difficult because you will want to get your grout clean, but once it's clean you will never have to do it again as long as you never use a mop a gain.

Now flip this over and it's a squeegee & your floor is completely dry.

See how easy that is and you didn't even get dirty doing it.

Now, because you use clean water your floor is not full of germs and bacteria, your grout won't get dirty because you sucked up all the dirty water and you won't need to mop as often as you use to.

As a matter of fact, in my home we only mop about once every 2 months.

Carpet

John & Mary how often do you shampoo your house. (Kill the way they shampoo)

So, let me get this straight.

You go down to where ever you rent those things from and hopefully you have a van to carry it all back.

Now that is after you spent your gas and all the time it took trying to figure out which of the 5 different solutions you need.

All the while you're doing that your wife is at home moving all the furniture around, so she is ready for you when you get here.

Then you run through your house trying to get it done in 1 day, so you don't need to rent it for 2.

How much did all that fun cost?

Plus, your solution?

Then it takes all day to dry, you are supposed to swing from the chandeliers, but you end up walking on it anyway.

Then 2 or 3 months later the stains come back.

Professional:

You probably found a coupon that said \$59.95 for your whole house, but how much did they charge you by the time they left?

Exactly, because they charge you extra for stains, if that makes any sense.

Then it takes all day to dry, you are supposed to swing from the chandeliers, but you end up walking on it anyway.

Then 2 or 3 months later the stains come back.

The reason all that happens is two reasons.

1, they don't have a rinse cycle.

You can imagine if you washed your clothes and after the spin cycle you took them out and dried them.

They would be hard and crunchy.

The same thing happens to your carpet.

Plus, if you mix water and dirt together guess what you get?

Mud, exactly.

See the Rainbow is the only thing that can get the dirt out and we have a rinse cycle.

First, you only put 2 or 3 caps of this cleaning solution.

This is the best cleaning solution you have ever seen.

It's a cleaner, reconditioned, deodorizer and protector all in one. (Shampoo and Rinse Carpet)

John and Mary, do me a favor and feel the difference in the carpet where I shampooed and over here.

Isn't that amazing. (Show Water)
